

Si bien parece que la guerra civil en Siria finalmente está terminando, es bastante evidente que Washington y el complejo militar-industrial-congresional definitivamente no obtuvieron el resultado que esperaba: la eliminación de Bashar al-Assad y el fin del régimen familiar de Assad.

Mirando hacia atrás y gracias a Google y WikiLeaks, podemos ver hasta qué punto el "Estado Profundo", que incluye al sector de tecnología de Estados Unidos, estaba dispuesto a ayudar a la Administración de Obama y, en particular, a la Secretaria de Estado Hillary Clinton a lograr uno de sus objetivos clave en el Medio Oriente.

Ahora que tenemos una comprensión clara de por qué el levantamiento en Siria fue tan importante (es decir, Israel lo necesitaba para asegurar su primacía nuclear en la región), como se prometió, aquí hay [uno de los correos electrónicos de Hillary Clinton con](#) fecha del 3 de agosto de 2012 que nos muestran claramente cómo Google estaba dispuesto a ayudar a la Secretaria a lograr sus objetivos en Siria:

El correo electrónico original fue de Jared Cohen, entonces director de Google Ideas y ahora

CEO de Jigsaw, que ahora se llama Google Ideas. [Aquí](#) está su currículum completo del sitio web del Consejo de Relaciones Exteriores, donde se lo promociona como uno de los grandes "pensadores globales", sea lo que eso sea:

El Sr. Cohen fue uno de los pocos miembros del Personal de Planificación de Políticas de la Secretaria de Estado Condoleezza Rice que se quedó cuando Hillary Clinton asumió el cargo en 2009 bajo la administración de Obama. Abandonó este cargo el 2 de septiembre de 2010, asumiendo un cargo en el Consejo de Relaciones Exteriores y también fue contratado como el primer director de [Google Ideas \(también conocido como Jigsaw\)](#) en octubre de 2010. Para aquellos de ustedes que no están al tanto de Jigsaw, es una incubadora de tecnología creada por Google con el mantra de que está utilizando sus capacidades para construir "herramientas para hacer que el mundo sea más seguro".

El correo electrónico mencionado anteriormente por el Sr. Cohen al subsecretario del Departamento de Estado William Burns describe brevemente cómo Google, en asociación con Al Jazeera, estaba trabajando en una herramienta que ayudaría a Estados Unidos a rastrear el conflicto sirio, en particular, las deserciones del régimen de Assad, lo que le daría a Washington un punto de vista interno de cómo avanzaba la guerra civil.

Google / Jigsaw está muy orgulloso de este logro, promocionándolo en su página web " [Projects - Made possible by Jigsaw](#) " como se muestra aquí:

El uso de esta herramienta de inteligencia para el análisis de datos de redes sociales en el contexto de la guerra civil siria, fue un ejemplo de la capacidad de Google para proporcionar información valiosa a sus socios y clientes. Cohen's rabbi is Eric Schmidt and Obama lackey.

My source is trying to find out if the billionaire owners are backing Cohen's efforts for regime change.

I'm thinking about having the Palestinians pick him up.

Jared Cohen, the Google policy official who met w/the Google Gypo Exec, ONE HOUR before the poor chap was nabbed, is off to Gaza next week....per a very good Google source.

Cohen, a Jew, is bound to get himself whacked....

Google is not clear if Cohen is operating w/a State Dept/WE license, or a hippie activist.

Google may be more important than Obama. Their lefty billionaire owners think they can change the world. I would prefer Google run the world vice the WE.
